Profile

Full Stack Software Developer with 2+ years of experience building scalable web applications and digital solutions. Proven expertise in front-end frameworks (React, Next.js), back-end development (Flask, Laravel, Node.js), and database management. Strong background in API development, data visualization, and web-based application design. Experienced in project management and technical documentation with a focus on creating user-friendly digital tools for organizational efficiency.

Work Experience

05/2025 – present
Nairobi, Kenya

Software developer (intern) Lixnet Technologies

- Developed ERP integration APIs which streamlined data synchronization from SAP, Oracle, and MS Dynamics systems, enhancing overall system efficiency.
- Built secure, paginated payroll reporting APIs with advanced filtering capabilities, enabling smooth integration with external systems and providing users with customized reporting options.
- Implemented a multi-tenant database architecture featuring country-specific schemas, which ensured complete data isolation and security, thereby protecting sensitive information across different user groups.
- Collaborated with cross-functional teams to translate technical requirements into functional system components, helping to ensure that all aspects of the project were aligned and effectively executed.
- Conducted comprehensive testing and validation processes, which ensured that applications met regulatory compliance standards, ultimately maintaining the integrity and reliability of the software.

03/2024 – present
Remote

Software developer Freelance

- Designed and developed full-stack web applications from the ground up, which allowed clients to effectively meet their conceptual requirements and enhance their online presence.
- Built scalable APIs, conducting thorough performance optimization analysis, which significantly improved system efficiency and user experience.
- Created responsive web solutions for NGO clients, focusing on usability and accessibility standards, which ensured that all users could easily navigate and utilize the applications.
- Performed quality assurance through systematic testing and bug resolution processes, helping to deliver reliable and high-quality software products.
- Prepared comprehensive technical documentation and user guidance materials for client handover, which facilitated smoother transitions and better understanding for end-users.
